Supplemental Information

Year Ended 31 December 2015

Overview of Portfolio

The Westfield Corporation ("Westfield") portfolio is primarily located in major markets with very strong demographic characteristics, spread across 8 states in the United States and the United Kingdom. These centres are generally located near or in major metropolitan areas, are anchored by long-term tenancies with major retailers and incorporate a wide cross-section of specialty retailers and national chain store operators with a focus on food, fashion, entertainment and leisure.

Westfield's shopping centre investments include wholly owned centres and centres held through joint ventures and co-ownership arrangements. Operating statistics for the global shopping centre portfolio (including part-owned shopping centres) are presented on a 100% basis.

Westfield has 16 Flagship centres which represent 82% of the total portfolio (by value). The Flagship portfolio comprises leading assets in major markets typically with total annual sales in excess of \$450 million, specialty annual sales in excess of \$500 per square foot and anchored by a premium department store. The remaining 18 Regional centres represent 18% of the total portfolio located in major urban markets in the United States.

The prior period disclosures contained in this document have not been restated for asset divestments in 2015. The 2015 period is presented excluding all assets divestments in the 2015 year.

The following table sets out key statistics for Westfield's portfolio as of December 31, 2015, split between Flagship and Regional centres.

	Flagship	Regional	Total
Centres	16	18	34
Retail Outlets	3,769	2,711	6,480

The distribution of Assets Under Management by Flagship and Regional assets and by Geography as of December 31, 2015 is set out in the following charts:

Note: All figures within this presentation are presented in US dollars unless otherwise stated and percentages are approximate based on standard rounding conventions.

Geographic and Retailer Diversity

The size and geographical spread of Westfield's property portfolio across major markets with very strong demographic characteristics provides a diversified revenue base and significantly reduces the dependence upon any single retailer, property or geographic region. On a proportionate basis, as of December 31, 2015, no property represented more than 15% of the total book value of shopping centre investments, and the 10 largest properties represented 68% of the total book value of shopping centre investments.

Portfolio – Largest Retail Groups

Westfield's shopping centre portfolio has a diverse range of retailers, with approximately 6,500 retail outlets. The largest retailer group, on a tenancy basis, occupied 18.8% of total GLA as of December 31, 2015, and the largest retailer group, on a revenue basis, contributed 2.5% of Westfield's total rental income for the year ended December 31, 2015.

In the United States, anchors have traditionally consisted of major departments stores, most of which own their store and the underlying land. However, certain stores at the shopping centres are owned by Westfield and are leased to the anchor under long-term leases at rates generally lower than the rents charged to specialty stores, or in some cases Westfield owns the underlying land and leases it to the anchor under a long-term ground lease. Additionally, Westfield generally enters into long-term reciprocal agreements with anchors which provide for operating covenants between the shopping centres and the anchors and generally require the anchors to contribute towards certain of the shopping centres' common area expenses.

In the United Kingdom anchors have traditionally leased their stores.

In addition to the above, the portfolio includes 22 theaters which occupied 1,401,000 square feet of GLA or 3.2% of total GLA as of December 31, 2015. As of the same date, the largest theater group occupied 504,000 square feet of GLA.

Lease Structures

The structure of Westfield's retail leases varies by country.

(i) *United States*

In the United States the majority of total annual rental income is derived from specialty shops. Standard specialty shop lease terms are 5 to 10 years and generally include rent escalations over the term of the lease. Total Rent represents both minimum rent and common area charges (excluding taxes). Anchor retailers generally own their own sites with reciprocal operating agreements in place with the shopping centre owner.

(ii) *United Kingdom*

In the United Kingdom, standard specialty store lease terms are generally 10 years and generally include a five-year upward only market review throughout the term of the lease. Total rent incorporated into this document includes base rent, service charge and insurance billings. Anchor retailers generally have lease terms in excess of 20 years and the leases generally include upward only market reviews every 5 years.

Across Westfield's shopping centre portfolio, for the year ended December 31, 2015, total specialty store rental income represented 94.1% of total annual rental income.

Contractual rent increases are recognised as rental income using the straight line method over the respective lease term which may result in the recognition of income not currently billable under the terms of the lease. The amount of contractual rent recognised in excess of rent billed for the years ended December 31, 2015, 2014 and 2013 was US\$(0.2) million, US\$1.1 million, US\$0.2 million respectively.

Percentage of Rent Related to Sales

Westfield's rental income is substantially derived from contracted rents payable under lease contracts. These lease structures reduce the volatility of rental income and provide stable cash flows.

For the year ended December 31, 2015, 97.1% of Westfield's total rental income was derived from total contracted rents and only 2.9% was directly related to the level of retailer sales.

The following table set out the percentage of total annual rental income which was derived from total rent at contracted levels under leases and the percentage which was directly related to the level of retailer sales for all retailers across the portfolio for the periods presented:

	Year Ended December 31		
	<u>2015</u>	<u>2014</u>	<u>2013</u>

Lease Expiry Profile

The weighted average unexpired lease term for specialty retailers is 5.5 years. Including anchor retailers at 16.9 years, the overall average is 7.2 years.

The following graph summarises Westfield's scheduled lease expirations for specialty shop leases less than 20,000 square feet in place as of December 31, 2015:
